RE: docket nos. 98N-1230, 96P-0418, 97P-0197

We believe the most effective and direct way to reduce salmonella in eggs would be to eliminate the practice of the horrible act of forced molting and are requesting you please do more than put warning labels on egg cartons and regulate egg refrigeration temperatures. I would rather have a shortage of eggs and pay a higher price at the grocery store than to know this practice continues. I makes us not want to buy eggs anymore.

Thank you in advance for all you will do.
