Donna Shalala, Secretary
U. S. Dept. of Health & Human Services
200 Independence Ave, S.W.
Washington, D.C. 20201

Dear Ms. Shalala,

I believe that food should be labeled so that we know if it has been irradiated or genetically modified. People have a right to know what they are eating. I feel that way about milk having hormones in it. Citizens are losing control over their own lives when they are kept ignorant about what is in their ~~food~~ food.

Sincerely,
Mrs Joan Bottwinick
