Docket # 94P-0036 2302 '00 JAN 24 A10:26

I wish to state that I believe that the FDA should require that foods containing trans-fat should have it listed on its labels.

I understand that trans-fats are even more damaging to one's health than saturated fats.

These unhealthy fats permeate practically all of our foods, so that we are compelled to eat them.

Why is it allowed to put unhealthy substances in our food supply?

Sincerely
Connie Anderson
