Tuesday, September 24	12:00 PM	11:00 AM	10:00 AM	9:00 AM	6:00 AM	James Underberg

Indication and Limitations of Use

VASCEPA is indicated as an adjunct to diet to reduce TG levels in adult patients with severe (≥500 mg/dL) hypertriglyceridemia.

- The effect of VASCEPA on the risk for pancreatitis in patients with severe hypertriglyceridemia has not been determined.
- The effect of VASCEPA on cardiovascular mortality and morbidity in patients with severe hypertriglyceridemia has not been determined.

Peter Toth, MD, PhD

Director of Preventative Cardiology, CGH Medical Center, Sterling, Illinois. Professor of Clinical Family and Community Medicine, University of Illinois College of Medicine. Professor of Clinical Medicine, Michigan State University College of Osteopathic Medicine, Peoria, Illinois.
