Ms. Butler

This letter concerns NCI Docket # (00P-0586) and AOPI Docket # (99-5158). We are opposed to any changes in FDA Section 133.3, we do not want wet or dry concentrated dairy ingrediants substituted for milk.

Ms. Butler

My Family & I run a small dairy here in the Thumb of Michigan, the farm is our only income. My wife and I have 3 small children we are trying our best to have them grow up with old fashioned values, many of which only the land can teach.

Dairy farming is a hard & very demanding life, we milk our cows twice a day, every single day of the year. We try our best to give our kids a balanced (vacations; walks; visits;) life but time & money are short.

I'm certainly not one to ask for handouts, but this is just another try for corporate America to take more money from my family while lowering the quality of cheese. Americans love cheese why let them lower their standards in the name of more profit, at our expense.

I hope you will do what is Right. Real cheese should be Real Cheese

Thank you,
