Dear Commissioner Henney,

May 8, 2000

I am writing about my concern for genetically engineered food. I fully support Docket No. 00P-1211/CP1 and hope you will issue a moratorium imposed on GE foods until proven safe. All current GE foods should be tested and labeled!

1868 '00 MAY 30 A9:59

GE Foods have been shown to be a threat to the environment and their effects should be throughly researched. Plus organic food is at risk of being contaminated by "genetic drift"!

Please don't let Monsanto own the FDA. Listen to consumer and environmental concerns. Keep the genetic diversity of our food crops intact. Thank you,

Erika Kane
