Subject: Support for the Today Sponge

Dear FDA Ombudsman:

Just a comment concerning my support for the FDA's re-approval of the Today Sponge. This form of contraceptive, gives women and their partners a safe and effective alternative form of birth control. Like many American women, I was very upset when the contraceptive sponge went off the market and am now very excited to read that the FDA is the process of inspecting the production plants. The FDA's re-approval will give women yet another safe contraceptive alternative, and to this end, I urge an expeditious approval to make this product available on the market.

Thank you for your consideration.
