RE: Docket No. 00P-1211/CP1

Dear Commissioner Henney,

I am writing to add my comments to the offizial rulemaking docket (#00P-1211/CP1) demanding that the FDA developed a thorough pre-market and environmental testing and mandatory labeling for genetically engineered foods.

I want to know what's in my food! It seriously bothers me that I may go and buy a bag of corn chips at the ~~corn chips~~ store and may also be supporting animal research if the chips have been pumped up with genes from another species. It ~~is~~ goes against my personal moral beliefs to use animals for any kind of "science experiments" and genetically engineered foods are the biggest kind of science experiment I can think of. I have a right to know if these products are in my food.

Please require labeling of genetically engineered foods so that we, as consumers, can make real and educated decisions when we go into the store.

Sincerely,
Kelly Ledje

00P-1211
