June 2, 2000

Dear Mr. Levitt,

I am writing to say that we believe companies that bottle water should offer consumers the same detailed reports of contaminants that public water utilities must.

Consumers have the right to know what is in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal regarding contaminants and think the manufacturers should also disclose where the water comes from.

Sincerely,

Joan and Milton Victor
