April 10, 2000

Dear Dr. Henry:

I am writing to ask you to allow soy + nut "milks" to continue to be called "milks". As a consumer of both vegetable and animal milks, I don't find it at all confusing as the situation now stands. It might perhaps make sense to have packages say "cow's milk" like they currently say "goat's milk", "almond milk", etc.

Thank you, [illegible]
