To Director of Food & Drugs. Admin. -

Being my husband in diabetic, I have been buying "Dryers" no sugar added "ice cream", an excellent product. There is, however, in all brands of carton icecreams one important omission. Why is it that containers of yogurt, sour cream, cottage cheese etc, all have a sealed plastic cover under the lid? This insures consumer safety in eating this product.

Check any brand of ice cream in containers - The lid comes off very easily making it easy for anyone to sample - or introduce a dirty or poisoneous addition to the ice cream.

In writing to a company, I was informed that they were working on this problem but could not say when it would be put to use - This was over a year ago, hence
