Dear Dr. Henney:

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1.

☑ All GE foods should be labeled so I am informed and have a choice.

☑ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:) It is only prudent and sensible that Testing should take place over an extended period of years to truly gage direct, indirect and commensurate effects to collateral organisms as well as the entire biom
