Dear Commissioner Henney,

I am writing to you because I am concerned about Genetically engineered foods. GE's have not been proven to be safe and I want them to be labeled so I have a choice over the foods I buy.

European Countries have required GE's be labeled in groceries, including US imports, so consumers know exactly what they are buying. GE foods pose a significant threat to the environment & threaten organic farms. Individuals with dietary and ethical concerns may consume foods that contain genes from animal species.

I ask that GE's be labeled & long term safety studies be required on all GE's. I also ask that a moratorium be placed on all new GE Foods & mandatory pre-market safety testing be enacted.

Sincerely,

Jessica L Alexander
