f America's
ght back from
e Endangered
Species Act. Today, there are fewer than 1,000 grizzlies in the lower 48 states. Their future remains uncertain as extractive industries continue to destroy the wild places they depend on for survival. Help us protect grizzly habitat and that of other threatened or endangered species nationwide.

Dear Mr. Joffe,
I support the petition to ban the forced molting of layer hens (docket 98P-0203/CP). This results in stressed unhealthy chickens & is not humane. Factory farming is not a healthy alternative for the animals or humans.
