Re Docket No. 00N-1396 & Docket No 00P-1595 | 1-31-01

Dear FDA Commissioner,

Genetically engineered food is Not what I WANT to eat. I want producers of products which contain GE foods to be forced to label their products as containing GE food.

If other folks don't mind eating GE foods, that's okay, but I still believe that the FDA should require pre-marketing safety testing & pre-market environmental review of these products before they are allowed to enter the food supply. It is extremely important to label what additional allergens may be present in any given product. Hidden allergens can be very harmful to the public.

Thanks for your attention to these matters. Sincerely,

Randye Schwartz
