FDA Commissioner 1-30-01

Docket No. 00N-1396 No. 00D-1598

9672 '01 FEB -5 A10:38

Dear Commish,

This issue is important to us all. The possibility of Genetically Engineered foods, unlabeled, appearing in our stores, is frightening. Even if they are judged "SAFE" we have a right to know. I do not want to get too deeply into the issues of the soil, the cross pollination, or the health effects - but we have the right to know.

Thank you,

Ed Gralla
