Docket No. 00N-1396 & Docket No. 99N-1598 FEB -5 A10:28

FDA Commissioner
Dockets Management Branch (HFA-305)
Food and Drug Adminstration
5630 Fishers Lane, Room 1061
Rockville, MD 20852

Dear Commisioner,

I feel a need to express my shock at the proposal for 'Genetically Engineered Food' and its testing and labeling. I am upset at the lack of humanity behind the proposal. It is so sad to see the blatant disrespect for free choice exhibited by the lack of mandatory labeling. The proposal is absurd, truly deceptive, nitpicking and bullyish in the way it limits even NON-GE producers from labeling thier products as 'GE Free'. I find GE crops a unnatural unecessary risk with alternatives to be looked at.

OVER →

00N-1396 C17

It is outrageous to subject me and my unknowing family members and friends to food altered and untested. I cannot support GE and all Biotech work. I support Sustainable methods which themselves can be implemented in such away as to make superflous the need for crops GE designed to be drenched in pesticides and herbicides. Its all detrimental and truly only in effect because of greed. I plead for no strings attached labeling of Non GE foods. I plead for mandatory testing of all foods to be sold. I also beg that the current food that is GE be pulled from the shelf until testing proves safety.

Thankyou for your time -

Michael Green
