1793 '99 JUL 19 P12:20

To: The FDA

As a young American citizen concerned with the welfare of all the animals and humans in our nation, I wish to inform you that I am against any xenotransplant research.

- Responsible health authorities would ban all xenotransplants outright, regardless of the species, particularly because of threats of inter-species virus transmission.
- There is no evidence that pig are any safer than nonhuman primates. Pig viruses are just as dangerous as nonhuman primate viruses.

C209

• In January 1999, the Council of Europe recommended a world-wide ban on xenotransplants

• There are safer and more humane alternatives to xenotransplantation, such as aggressively promoting preventive medicine and increasing human organ donation rates.
