Dear Sir,

It is with great alarm, that I've been reading of the foods that are being messed with, in other words GENETIC ENGINEERING, we are being used as guinea pigs, irregardless of what these foods do our bodies. It is unnatural & harmful, & all food producers should be made to label their foods GE so we have a choice. No one in their right mind would voluntarily eat these foods

1) all GE foods & food ingredients so we are informed & have a choice

2) all GE foods should not be assumed to be safe & should be subject to mandatory pre-market safety tests

3) There should be a moratorium on GE foods until long-term studies show they are safe for ~~terma~~ human health & the environment.

Yours truly
Mrs Osborn
