FDA
EXECUTIVE SECRETARIAT

Dear Commissioner,

I have used and liked Nutrasweet, & Nutrataste (which contains aspartame) for 5-6 years and have liked it. Until recently I did not know that it was an approved sweetner because of a few greedy and dishonest people who place profits above human life and well-being. With the FDA and our Congress culpable only an informed and active public will affect its reclassification from food additive to a Toxic Drug from which I've been subjected too - severe chronic fatigue, severe itchy areas especially scalp, hypertension etc, I do not understand how you can keep this neurotoxin on the market.

Please advise. Thank you

Sincerely,

Sister Bernarda Dinna

How can we Trust you?
I always did until recently.
