I want to go on record as opposing the Morning After Pill to be over the Counter drug.

Unsupervised access will put women's health at risk. It will increase STD rates + will cause the death of newly created life. There is evidence that it can cause an early abortion if fertilization has occurred.

I also fear men will exploit women by giving them this drug to hide their sexual activity with minor girls.

The FDA needs to be concerned about the health of these women. Do not make it available over the counter

2005N-0345
