TABLE OF CONTENTS

TABLE OF CONTENTS

SECTION ONE - Names and complete addresses of the distributor and manufacturer of the new dietary ingredient.

SECTION TWO - Name of the new dietary ingredient.

SECTION THREE - Description of the new dietary ingredient.

SECTION FOUR - Level of the new dietary ingredient in the dietary supplement.

SECTION FIVE - The conditions of use recommended or suggested in the labeling of the dietary supplement.

SECTION SIX - History of use or other evidence of safety establishing that the dietary ingredient Zeaxanthin Purified Concentrate as recommended in the labeling of dietary supplement products will be reasonably expected to be safe.

Attachment 1 - Zeaxanthin production process

Attachment 2 – Zeaxanthin Purified Concentrate (ZPC) proximate analysis.

Attachment 3 –

a) Eurofins detailed analysis Zeaxanthin Purified Concentrate, including heavy metals and hexane.

b) Medallion Labs – proximate analysis of fiber and fatty acid content of ZPC.

c) Alturas Analytics, Inc. wax and hexane analysis of ZPC.

d) Chrysantis certificate of analysis.

Attachment 4 – Chrysantis material data safety sheet for ZPC.

Attachment 5 – Kruger, C., Murphy, M., DeFreitas, Z., Pfannkuch, F., Heimbach, J. An innovative approach to the determination of safety for a dietary ingredient derived from a new source; case study using a crystalline lutein product. Food and Chemical Toxicology 2002; 40:1535-1549.

Attachment 6 – Seddon, J., Ajani, U., Sperduto, R., Hiller, R., Blair, N., Burton, T., Farber, M., Gragoudas, E., Haller, J., Miller, D., et al. Dietary carotenoids, vitamins A, C, and E, and advance age-related macular degeneration. JAMA 1994; 272: 1413-1420.
