Dear Ms Henney:

The consumption of added sugar has jumped 27% since 1984, squeezing healthy foods out of the diet. As a member of the Center for Science in the Public Interest (CSPI), as well as an obstetrician-gynecologist and a mother, I urge the FDA to establish a "Daily Reference Value" for added sugar of 40 grams and to require labels to disclose how much added sugar a food contains.

Sincerely,

Marilyn M. Honegger, MD
