Dec. 19, 1999

Dear Dr. Henney:

Are we stupid or just not paying attention that we have not banned the use of medical antibiotics for growth promotion in livestock and poultry? Surely we can afford to follow the lead of the European Union in this matter.

I urge you to use your authority to issue an immediate ban on the use medical antibiotics to promote growth in the agricultural/livestock industry.

Yours truly,

Ruth E. Brown
