Dear Sir or Madam, 3432 00 AUG 24 12:51 8/10/00

I am writing to you about the cruel treatment of chicken, especially hens. These animals are made to starve to promote egg laying.

The cruel treatment of these animals is causing Salmonella Enteritidis (SE) to become more widespread.

It is time for federal regulations of chicken farms to help protect human health and the cruel treatment of these animals.

I ask you to do what you can to regulate this industry and protect human health.

Sincerely,

C69
