Washington, D.C. 20204

Dear Sir,

The makers of bottled water must be required to make available detailed reports of contaminants.

All of the bottles sold should have labels indicating the whereabouts of the source of the water.

This is so important to water drinkers who are urged by medical practitioners to increase water intake to maintain good health.

I urge you to do what you can to provide this protection to the public.

Yours truly,
Ruth H. Stiles
