Dear Commissioner Henney:

6925 '00 SEP 13 P2:36

I am writing to protest genetically engineered foods. I saw no problem when plant species were combined with other plants. But I feel animal genes and pesticide resistant and insect resistant genes have gone WAY over the line and are a time-bomb for American people's health and lives. As bad or worse than the overuse of anti biotics in livestock feed. I wish I were younger - and wealthier - to move to Europe where they have enough sense to leave this stuff alone!

And I vehemently disagree with no labeling of these "Frankenfoods". This is supposed to be a free country and I would like the freedom to choose not to eat this stuff!

I hope you will do what you can to right these wrongs,

Sincerely,
Sheri Hensley

C5805
