October 14, 1999

Dear Ms. Henney, M.D.,

I am writing in support of the CSPI petition against sub-therapeutic uses of antibiotics in livestock.

I find this practice disturbing and feel it has contributed greatly to the rise of "super-bugs".

I would like to see the heavy reliance on antibiotics phased out (as much as is reasonably possible) and replaced with healthier farming practices.

You are in a position to encourage this and should use this as an opportunity to do the right thing

C1831
