Jane Henney
U.S. F.D.A.

Dear Ms. Henney,

As I am told you have some influence in the area of antibiotic use in livestock feed, I am writing to express my deep concern that this is not proving to be a safe practice.

I believe the evidence is strong that this practice is literally killing children, the elderly and potentially anyone forced to live in the U.S. today.

Your response would be interesting, but I'm more interested in your actions.

Thank you.
