Dear Commissioner,

Please prohibit livestock producers from routinely adding medically important antibiotics like vancomycin to animal feed to promote growth.

Judith Koltas
Clerk/Sales/Herb Buyer

P.S. also (1) pursue a moratorium on all genetically engineered foods + crops until safety testing proves them saf for human health + those on mkt. should be LABELED & safety tested results on label also.
(2) begin to phase out industrial agriculture by banning dangerous pesticides as well as hormone implants, antibiotics as well as confinement of animals.
(3) Implement long term "transition-to-organic agriculture program from chemical intensive type now. Hopefully by 2010 will be 30% organic
