Dear FDA (RE: Docket # 99D-0557) 5894 '00 JAN 13 P3:29

Writing to say we are against ANY xenotransplant research.

Responsible health authorities would ban all xenotransplants outright, regardless of species, particularly due to threats of inter species virus transmission.

Pigs being considered as the source animal for xenotransplants, aren't any safer than non-human primates, as evidence proves. Just as dangerous

U.S. should follow Europes lead in recommending a ban on xenotransplants

There are safer & more humane alternatives to xenotransplantion, such as promoting preventive medicine & increasing human organ donation rates

Please don't do this.
