Dear Mr. Levitt 5/27/2000

Read your booklet on water, filters etc. Very interesting article, and a good deal of information. What I did not find was Radium, unless I missed it. We are way over on Radium. Our Town (Batavia) does send us a print out once a year but it does not change. Always the same - very high in content. There was some items I did not fully understand, but I will probably have to re-read a →

Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from.
