To Jos. Levitt,

Even though this vote is another environmental restriction by a gov't. department, I feel H_2O should be scrutinized and regulated with all manner of scientific means.

Thank you for the work the Center does for the health of our citizens.

Sincerely,

Joan Fox

Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from.
