Re: the Genetically Engineered Food Right-to-Know Act HR3377
Docket Number 00P-1211/CP1 April 24, 2000

6067 '00 MAY -9 P2:22

Dear Commissioner James Henney

My family & I are so very concerned about genetically engineered food. Some people may like this artificial food but we DO NOT. As an American citizen we need to know what we buy & what we consume. We can not do so if genetically engineered food is NOT PROPERLY LABELED!!

You must do everything in your power to see that food that is genetically altered in any way be properly labeled. This will enable us as consumers to make a choice

We demand to know what goes into the food we buy - All Food must be properly labeled! stating that it is GMO FREE or that it is made up of genetically engineered food!

00P-1211 C348

Sincerely Elizabeth Schappert
