Dear FDA- 1/16/01

I am writing in reference to Docket # 98P-0151/CP1. Animals that are too sick or injured should not be allowed to enter the human food chain. Some downed animals may be afflicted with the disease of "Mad cow Disease". It is terribly inhumane to the animals + it is impossible to move them without them being pushed with tractors or dragged with chains. Downed animals could be prevented with better care + handling. Thank you. Mrs Rita Flygar
