Docket # 98P-0151/CPI

Please discontinue the marketing & slaughter of downed & sick animals.
This is inhuman and sick and should be stopped in the yr 2001.

Think of yourself obtaining sick & slaughtered meat over your grocery store counter and taking this home to be put on your dining table and consumed by our loved ones.

Meat is becoming a health issue concerning cancer and this does not give much assurance to the quality of our meat.
