Jane Henney
Commissioner of Food & Drug Ad.

Dear Mr Henney

I write out of deep concern for our increasingly questionable food supply. As consumers we've lost control to know what it is and what its value is.

Present concern: genetically engineered foods. We have a right to have foods labeled in order to make intelligent choices and corporations need to be held accountable for full disclosure.

Please, support the petition presented by the Center for Food Safety.

Sincerely
Gladys Berridge
