Jane Henney, Commissioner
Food and Drug Administration
Docket # 00P-1211/CP1
5630 Fishers Lane, Room 1061 (HFA-305)
Rockville MD 20852

Dear Commissioner Henney:

I am concerned about genetically-engineered (GE) foods and ask that

1. All G.E. foods on the market be labeled, so that we know what's in the foods we're eating
2. No new GE foods or products with GE ingredients be released until the Food and Drug Administration do long-term safety testing on them.

I have a daughter-in-law who has multiple allergies and it is too early to tell whether some of my grandchildren may develop the same allergies. How can she (and they) protect themselves from possible problems unless she knows which foods contain GE ingredients? Will my grandchildren have to be guinea pigs because the FDA hasn't tested this innovation in our food <u>before</u> huge problems show up, somewhere down the road?

Thank you.

Sincerely,
Marjory M. Donn
