Feb [illegible]

Docket #00P-1598

Dear Commissioner,

I have been a consumer of organic and recycled products for many years. My income makes it a challenge to afford organic foods. I'm extremely disappointed and infuriated at the decision by FDA to put restrictions on companies voluntarily labelling their foods non-GMO. I deplore the other decision to not require labelling on any/all foods that are genetically modified organisms. It's unfair to the consumers. For companies like Monsanto to have so much power and influence over a government agency is a disgrace. Please reverse the decisions for the good of the consumers. Also I believe in the importance of pre-market safety testing for genetically engineered foods and products. Thank you for your time.
