Dear Ms. Henney,

I am writing to ask your support of a legal petition from the Center for Food Safety in regards to genetically engineered foods. We need comprehensive government regulation of GE foods - they differ materially from non-modified plants. Most of the natural food brands can't guarantee that their food products do not even contain GE foods! Once these seeds are released in nature, we can never take them back.

We risk loss of biodiversity, increased allergies, and control of the world's seeds through patents owned by a few corporations.

I ask that the FDA require all GE foods presently on the market to be labeled, and all new GE foods tested for safety before they go to market.

Sincerely,
Sue Murawski
