Dear Ms Kenny:

I am dismayed that FDA such an insufficient policy for genetically engineered foods is submitted. Please recall it and take action against such foods. Our food supply is in great danger.

If this is the leaning of the FDA it is as good as none. I've read and heard speakers tell of the research. These large companies pushing for easy bucks will not be our safeguard.

I look forward to just action.

Thank you.

L. M. Severina Caron
