Dear Commissioner:

I am writing to you regarding genetically engineered foods.

I am very concerned about this practice as I am alergic to many foods. One of the worst for me is fish + seafood, which makes my throat swell. Consequently, adding fish to other foods such as tomatoes is a real threat to me.

I feel it is wrong to have G.E. food for consumption without our knowing about it.

All G.E. Foods + food ingredients should be labled so the consumer is informed and has a choice.

G.E. foods should be subject to mandatory pre-market safety testing.

There should be a moratorium on G.E. foods until long term studies show they are safe for human consumption, health and the environment.
