5-31-01

Dear Commissioner Henney,

I urge you to support the legal petition (Docket #00P-1211/CP1) to take all genetically engineered (GE) foods and crops off the market and subject them to rigorous safety testing. Over 50 consumer groups who care about the health of the population and not profit have filed this petition. My group, the "Center for Food Safety" is among them. The FDA is suppose to protect U.S. citizens with the laws you pass and we're counting on you to do this with integrity.

Sincerely,
Mesreen Olson
