Rockville, MD 20852

'01 APR -4 A10:48

Dear FDA Commissioner:

We are in opposition to the FDA's new proposed rule & guidance on genetically engineered (GE) foods. The agency's voluntary labeling & notification proposals are totally inadequate to protect human health, the environment & our right to know. We do, however, support the following:

1. All GE foods & food ingredients must be labelled
2. GE foods must not be assumed safe & must be subject to mandatory pre-market safety testing.
3. There must be a moratorium on GE foods until long-term studies prove they're safe for human health & the environment

Yours truly,
[illegible]
Phoenix
