Dear FDA Commissioner;
re: Docket # 00N-1396-00D-1598

I OPPOSE FDA's new proposed rule and guidance on Genetically Engineered Food and the Agency's Labelling Proposals.

ALL Genetically Engineered Food needs to be labeled! We can't assume Genetically Engineerd Food to be safe, I believe there needs to be a moratorium on marketing any more until there have been more independent studies completed.

As citizens of this Planet, we demand truthful Labelling so we may make informed decisions about our lives. Genetically engineered foods should be subject to pre-market mandatory safety testing.

Sincerely,
Deborah A. Goslin
