Docket #00N-1396 00D-1598

Feb 11, 2001

Dear Commissioner -

I am very concerned, as a consumer, about the FDA's refusal to require the labeling of genetically engineered ingredients in the foods I eat. I urge you to require labeling (and hold off on allowing these ingredients) until further testing of their effects are known. I feel as if we all, as consumers of foods in the US, need know what exactly it is we are consuming. Thank you very much, Jim Barr
