Commissioner Jane Henney
Docket N 00P-1211/CP1
FDA Dockets Management

8252 '01 JAN 29 A10:43

Commissioner Jane Henney, Jan 14, 2001

As a consumer I want to know what genes are not being mixed with other genes that nature didn't intend to mix.

I'm sure you concerned as well.

How many times has mankind made mistakes regretted down the road..?

Our right to know is a must so we can make choices.

And, GE is making America loose markets overseas -

Genetic engineering must be used with utmost caution. Already monarch butterflies and other insects beneficial to us are being affected. And god knows the health effects to us... We can't even begin to trace them...

Do what you can for us all.

Thankyou.

Sincerely,

Lorna Moffat
