We do not want to be treated as guinea pigs any longer!

DEAR FDA,

I am writing to express my opposition to the FDA's new proposed rule ~~and guidance~~ on genetically engineered (GE) foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- ✓ All GE foods and food ingredients should be labeled so I am informed and have a choice.
- ✓ GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- ✓ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.
