Dear FDA Commissioner:

I earnestly request that you demand a moratorium on all genetically engineered foods. In the meantime, it is absolutely necessary that all genetically engineered foods be conspicuously labeled.

Please note: the marvelous AID's "cocktails" that are so effective in the short term are proving to contribute to very serious side effects in the long term.

Genetically engineered food pose many negative threats: harm to other forms of life, harm to diets; harm to the environment, etc, etc.

Thank you for your consideration.

Sincerely,

Joseph Gilmour
