Dear Mr. Friedman,

Please, please, please stop requiring companies to do testing of products on defenseless, innocent animals. These are cruel + obsolete.

Have you heard their screams of pain, have you felt this kind of suffering in your own life? Please find safe + harmless ways to market your creams, to make money, to keep the consumer boat afloat without hurting any more creatures! C3019

SSP-0435

I don't know you personally but I do know that if you allow + even promote testing on animals, or birds or any other sentient being, you will suffer at the hands of this karma.

Do not claim ignorance or justification for this action as FDA officer; anyone who allows or takes part in torture + murder will eventually realize this suffering upon himself.

Change it now! Don't wait, fight for systems in this moment of opportunity.

Truly,

Counseling & Hypnotherapy
